  - PVC Waste & Overflow
  - Linear Waste & Overflow

## INSTALLATION TIPS

- 1) Install according to Owner's Manual and local codes.
- 2) Any tub with whirlpool, Airbath<sup>®</sup> or ANEX system requires an access panel.
- 3) Hot water supply should be 65-75% of tub capacity or greater.
- 4) Cut Dimensions: 2" Smaller than Size of tub. It is recommended to wait for unit to arrive before cutting.
- 5) Always consult your local plumber for recommendations as installations will vary.
- 6) The combination of multiple systems and options may require components to stick out and/or be remotely installed in the field.
- 7) All specifications are subject to change without notice.
  - Certain options or altering the pump/blower location may cause the pump/blower to extend beyond the tub decking.
  - Factory installed aprons may increase the overall height of the tub when ordered with certain accessories (ie. Linear Drain).
- 8) Center Drain tubs with Linear Drain option may not use 9" Grab Bar option. Only the 14" or 16" Grab Bar option is available on these units.

## ELECTRICAL REQUIREMENTS

Americh recommends one 20 amp ground fault circuit interrupter (GFCI) for each power supply provided with the bathtub.
