EXTRA HARDWARE LIST

C X 1

D X 1

ADDITIONAL TOOLS (Not Provided)

Note: It is not recommended to use power tools during assembly. You may use power tools to assist in mounting the safety strap kit to the wall.

Phillips Head Screw Driver

- Step 1.** Hold the Support Plate (2) in the desired location of the wall unit. This plate will be about 2-1/2" lower than the top of the wall unit. Making sure the Support Plate (2) is level, use a pencil to mark the anchor locations using the Support Plate (2) screw holes as a guide. We recommend using a leveler to make sure the Support Plate (2) is oriented correctly.
- Drill two 11/32" holes in these marked spots and tap the Wall Anchors (E) into the drilled holes. Secure the Support Plate (2) to the Wall Anchors (E) with Screws (D). See Image.
 - Mount the completed unit onto the Support Plate (2). The back of the unit has a recessed area that will hook on to the Support Plate (2). Use a pencil to mark the 2nd set of anchor locations using the holes in the wall unit as a guide. See Image.
 - Remove the wall unit and drill two 11/32" holes at the pencil marks, and tap the Wall Anchors (E) into the holes.
 - Remount the wall unit and secure it to the Wall Anchors (E) with Screws (D). See image.
