- \bullet Thisp roduct uses universal home power.

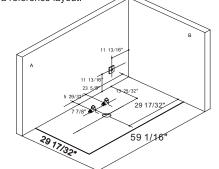

Δ

Notice

*External circuitry need to equip with high sensitive and fast type leakage protection switch. (Induced current rating below 15MA, trip time should less than 0.1 second, rated current is above 30A.)

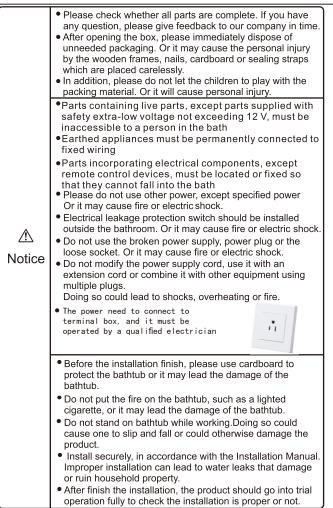

* The product should be installed the grounding and electric leakage switch by a qualified licensed electrician.

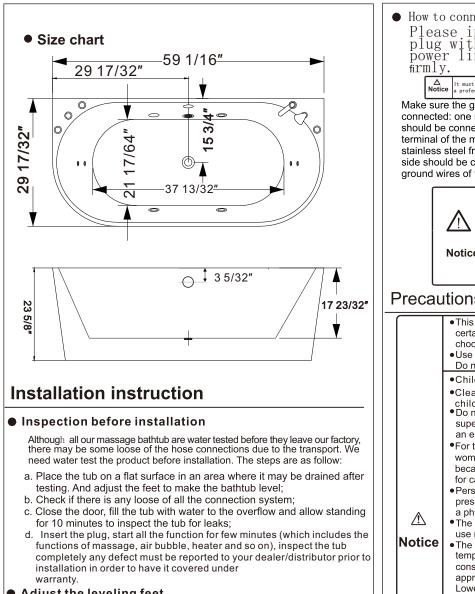

- Please reserve the drainage hole≥ø50mm, make sure the drainage pipes accord with the water valve.
- User need to reserve the connectors of 1/2" external thread cold/hot water hoses, which outstand the wall 30mm. It is suggested to install a valve in each pipe, the location of installed should be designed by user, which is convenient for maintaining.
- As each bathroom or power and drain of each bathtub is slightly different, please place the bathtub according to the actual situation, the following illustration as a reference layout:

Notice The safe distance between power supply and water supply should be not less than 30cm.

Precautions for installation

Adjust the leveling feet

According to different sizes bathtubs, we design about several leveling feet to adjust the bathtub. Please use a wrench or level ruler to level the bathtub.

Note: If the bathtub is not level, it may

lead : - noise increased:

-remaining water in the hoses or the drainage;

-bathtub shaking;

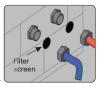

2.Adjust screw nut to the level position

1.Adjust height of the leveling feet

Installation instruction

• How to connect the water?

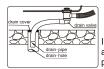

For ease of use, our bathtub is equipped with stainless steel cold and hot water hoses (connector ø 1/2"). Please connect the cold and hot water hoses to the bathroom's cold and hot water hoses accordingly.

 \mathbb{B}

 (\mathbb{A})

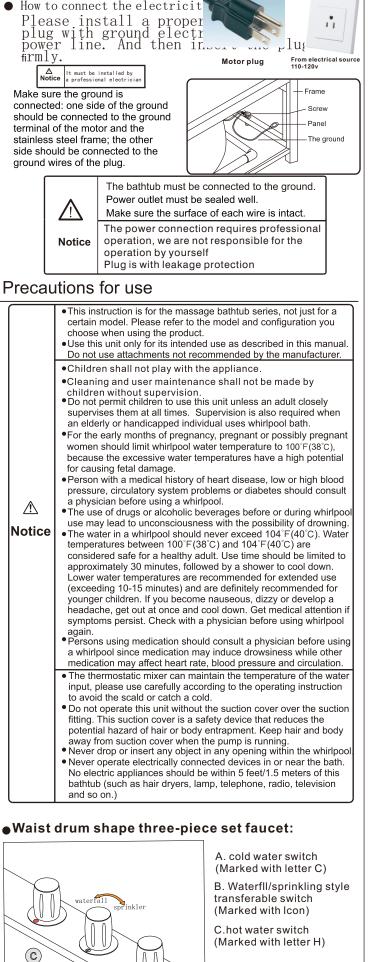

Before connect bathtub water inlet pipe, first open water pipe for a period of time, then put filter screen to ensure that the debris will not enter the bathtub pipe. So that we can effectively extend the life of the fitting.

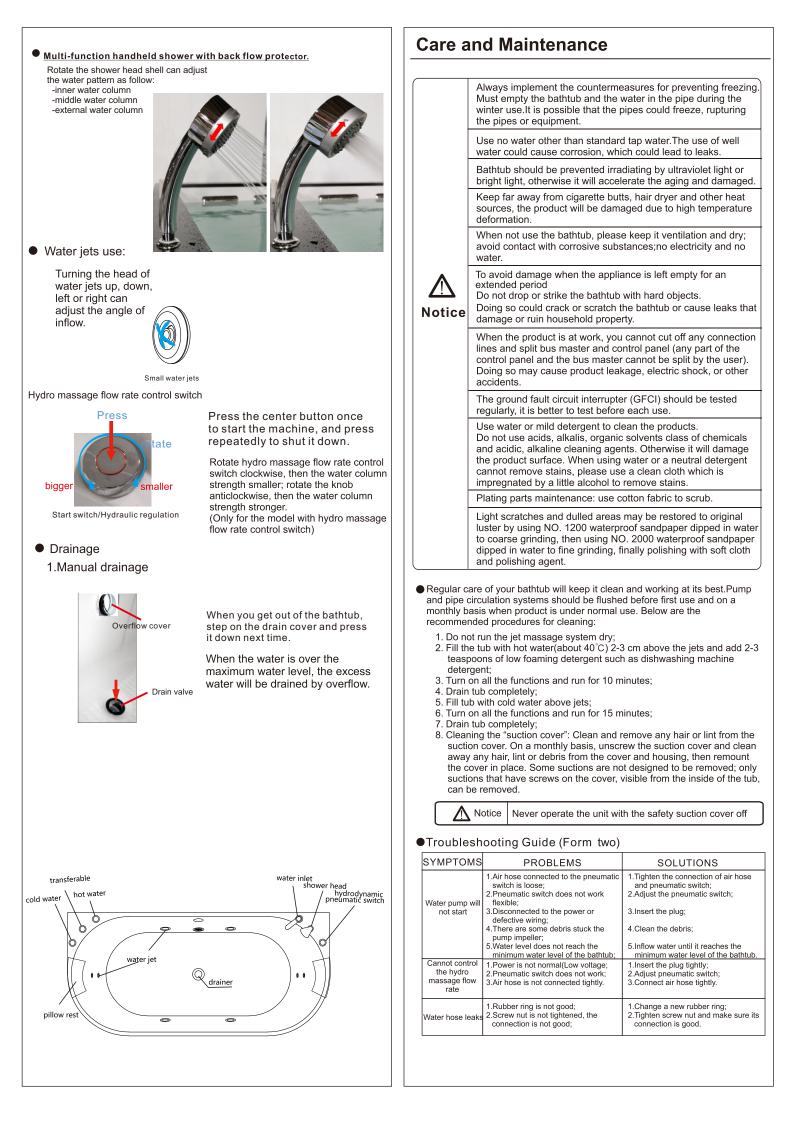

Insert the drain-pipe to the drain-hole on the floor, and then cover it with water retaining cover to prevent waste water spilling.

The red hose stands for hot water hose; the blue hose stands for cold water hose; Drain-pipe should be installed with slope above 1:50;

Notice Drain-pipe should be installed with slope above 1:50; b not hold the drain-pipe and cold/hot water hoses when moving the bathtub, and do not crash it with hard objects.
