

FSART1: Fuego Rotisserie Kit

For use with Fuego Premium Grills

FSART1 includes the following components:

- 1 - Rotisserie Motor
- 1 - Rotisserie Motor Mount
- 2 - Phillips Head Mounting Screws
- 1 - Rotisserie Rod
- 2 - Rotisserie Forks
- 1 - Rotisserie Handle
- 1 - Rotisserie Balance Weight
- 1 - Rotisserie Rod Slotted Nut
- 1 - Rotisserie Handle / Weight Washer

Installation Instructions:

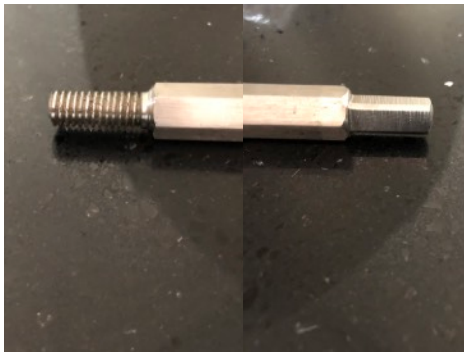

1. Remove the warming rack.

2. Install the motor mounting bracket using the supplied Phillips head mounting screws. We recommend mounting on the left side of the grill but either side is OK.

3. Place the motor into the mounting bracket with the on/off switch to the front by sliding down onto the bracket.

4. Remove the black protective rubber from both ends of the rod.

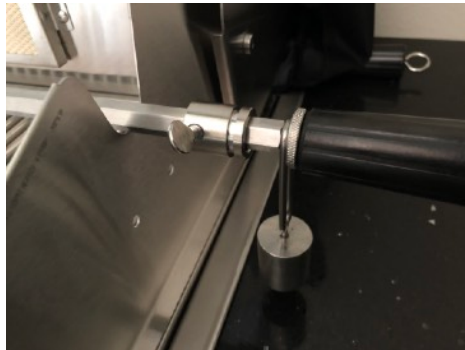

5. Install the balance weight onto the threaded end of the rod.

6. Screw the washer onto the rod end so that the balance weight can still spin freely on the rod.

7. Screw the black handle onto the threaded end of the rod tight to the locking nut. The balance weight should be able to freely rotate as the rod spins.

8. Install the slotted nut loosely onto the rod and slide down toward the handle.

9. Install the two sets of forks onto the rod with the forks pointed inward at one another.

10. Align the square end of the rod with the motor and insert the rod into the motor.

11. Align the slot on the slotted nut with the upper firebox support.

12. Plug the rotisserie motor into a standard 110V power supply.
