

Features

- Designed to work with a DTV+ digital system either individually or with a second digital valve (two, three, or sixport valve).
- For use in showering and/or bathing applications.
- Up to 13 gallons per minute (49.2 L) flow rate with maximum flow of 8 gallons per minute (30.3 L) from one outlet.
- 1/2" hot/cold supply inlets.

Installation

- Two independently controllable 1/2" outlets.
- Prewired with three-prong plug for connection to 110 V AC receptacle.
- Mounts within standard 2" x 4" (38 x 102 mm) walls.

Notes

Install this product according to the installation guide.

For use with showerheads or handsprays rated at 1.5 gal/min (5.7 l/min) or higher.

If used for bath-shower system, the bath spout must be connected to the #1 outlet port and restricted to 10 gal/min (37.9 l/min) maximum. Provide access for servicing valve.

Use 1/2" supply lines.

13 gal/min (49.2 l/min) Do not install this valve in walls exposed to 1.5 gal/min (5.7 l/min) subfreezing temperatures.

Avoid mounting the valve in a wall adjacent to a frequently occupied room, such as a bedroom or living room.

Pressure regulators are strongly recommended in applications where large pressure swings are anticipated or pressure differences between the supplies exist, such as commercial installations with separate hot and cold supply systems.

Water hammer arrestors and shut-offs are required in both the hot and cold supplies.

A 1/2" cap must be installed on any unused
