Material
- Vitreous china.

Technology
- Adjustment dial lets you set how much cleaning solution is dispensed with every flush.
- Optional: uses two AAA batteries (included) to power the LED system indicator light. System indicator light will notify user when system is working properly and when to replace cleaning agent or batteries.
- Single-flush gravity uses the force of gravity and a precision-engineered tank, bowl, and trapway to create a strong siphon during flushing.
- AquaPiston® canister allows water to flow out of the tank from all sides (360°), increasing the power and effectiveness of the flush.
- Flush valve's 3:2 ratio harnesses the natural force of gravity and optimizes flush performance.
- Durable canister design has 90% less exposed seal material than a 3" (76 mm) flapper, for leak-free performance. Light-touch canister flush requires a lower actuation force than a flapper.

Installation
- Standard 12" (305 mm) rough-in.
- 10" and 14" (254 mm and 356 mm) rough-in kits also available.
