

IMPORTANT INFORMATION

CAUTION: Risk of personal injury. If not blocked, hazardous gases may leak from the flange opening. Temporarily place a rag in the flange opening until the toilet is ready to install.

WARNING: Risk of product damage. Do not use in-tank cleaners in your toilet. Products containing chlorine (calcium hypochlorite) can seriously damage fittings in the tank. This damage can cause leakage and property damage.

IMPORTANT! If two Installation Guides were received, use this document (1456322-2) to install bowl K-4326. Use 1263655-2 to install bowl K-4353.

IMPORTANT! If the tank gasket is not fully compressed, water may leak between the tank and the bowl. Ensure that the tank is secured.

8A. Remove the canister by turning the canister in either direction past the point of resistance.

9A. Reinstall the canister by pressing it firmly onto the valve body. Position the blue button on the right.

10A. Apply the provided lubricant to the trapway gasket and to the outside and bottom surfaces of the bowl outlet.

12A. Align the bracket slots with the holes.

15A. Tighten the bolts evenly.

RENSEIGNEMENTS IMPORTANTS

ATTENTION: Risque de blessures. Si le dispositif n'est pas bloqué, une fuite de gaz dangereux pourrait provenir de l'ouverture de la bride. Si la toilette n'est pas installée immédiatement, recouvrir temporairement l'ouverture de la bride avec un chiffon.

AVERTISSEMENT: Risque d'endommagement du produit. Ne pas utiliser de détergents faits pour le réservoir dans la toilette. Les produits contenant du chlore (hypochlorite de calcium) peuvent sérieusement endommager les raccords du réservoir. Ceci peut créer des fuites et des dommages matériels.

IMPORTANT! Si deux guides d'installation ont été reçus, utiliser ce document (1456322-2) pour installer la cuvette K-4326. Utiliser le document 1263655-2 pour installer la cuvette K-4353.

IMPORTANT! Si le joint du réservoir n'est pas entièrement comprimé, il pourrait y avoir des fuites d'eau entre le réservoir et la cuvette. S'assurer que le réservoir est bien fixé en place.

8A. Retirer la cartouche en tournant celle-ci dans n'importe quelle direction au-delà du point de résistance.

9A. Réinstaller la cartouche en l'appuyant fermement sur le corps de la vanne. Positionner le bouton bleu sur la droite.

10A. Appliquer le lubrifiant fourni sur le joint statique du siphon et sur la surface extérieure et la surface inférieure de l'orifice de sortie de la cuvette.

12A. Aligner les fentes du support sur les trous.

15A. Serrer les boulons de manière uniforme.

INFORMACIÓN IMPORTANTE

PRECAUCIÓN: Riesgo de lesiones personales. Si no se tapa la abertura de la brida, podrían fugarse gases nocivos. Si el inodoro nuevo no se instala de inmediato, cubra provisionalmente la abertura de la brida con un trapo.

ADVERTENCIA: Riesgo de daños al producto. No utilice productos para limpiar el inodoro que se colocan dentro del tanque. Los productos que contienen cloro (hipoclorito de calcio) pueden dañar las piezas del tanque. Esto puede causar fugas y daños a la propiedad.

IMPORTANT! Si recibió dos guías de instalación, use este documento (1456322-2) para instalar la taza de inodoro K-4326. Use el documento 1263655-2 para instalar la taza de inodoro K-4353.

IMPORTANTE! Si el empaque del tanque no se comprime por completo, podría fugarse agua entre el tanque y la taza. Asegúrese de que el tanque quede bien fijo.

8A. Para retirar el cilindro, gírelo en cualquier dirección más allá del punto en que sienta resistencia.

9A. Para volver a instalar el cilindro, oprímalo con firmeza en el cuerpo de la válvula. Coloque el botón azul a la derecha.

10A. Aplique el lubricante que se incluye al empaque de la boca de sifón y a las superficies exterior e inferior de la salida de la taza.

12A. Alinee las ranuras de los soportes con los orificios.

15A. Apriete al parejo los pernos.

17A. With the rod nuts $7/8"$ (22 mm) from the end of the push button rods, thread the push button rods into the button housing.

18A. Install the tank lid and test the length of the push button rods.

18B. Adjust the rod length if needed. Tighten the rod nuts.

19A. Turn on the water supply and adjust the water level. Flush the toilet and recheck the water level.

23A. If necessary, reverse the "+" to shorten.
