DIMENSIONS & SPECIFICATIONS

Front View

Side View

ATTENTION! Due to manufacturing process any dimensions may have a tolerance up to 3/8". All sizes are for reference only. It is highly recommended to pull all dimensions of actual model for installation and measuring purposes.

ATTENTION! If two or more vanity cabinets are installed next to each other there will be a visible seam between vanity tops and between vanity cabinets or between drawer base cabinets.

**INSTALLATION STEPS****INSTALL DOOR & DRAWER HANDLES**

All WT5147-24 vanity cabinets by LegionFurniture come pre-assembled. All door and drawer handles are installed from the inner side of the drawer to avoid damage during transportation. Open the drawers to install the handles. Unscrew every handle and install them from the outer side of the doors and drawers. **See Figure 1**

Note: It is highly recommended not to use electric drill to avoid overtightening the screws during handle installation.

See Figure 1

VANITY CABINET ASSEMBLY

Prior to installation of the glass vanity top you must apply a silicone layer by a perimeter of the vanity base cabinet and carefully lay down the vanity top on top of the vanity cabinet.

See Figure 2

Note (single vanity sink cabinet installation): Vanity top is slightly wider than the actual cabinet. Make sure that outstanding edges are equal at left and right sides.

Apply a silicone layer on the back side of the vanity top that will be adjacent to the wall.

Allow the silicone dry for 48 hours prior to the first use of the vanity cabinet.

See Figure 2
