

SINK CARE

MOSAIC

Mosaic is a very durable material for the bath, kitchen or bar.

Mild soap and water or mild household cleaners should be used to maintain the beauty of this product.

Stainless steel cleaner should not be used on our stainless steel mosaic sinks.

Ordinary grout cleaner will clean stained grout to its original color if needed.

Stone mosaic sinks have a sealer applied to help protect the sink.

It is important that a stone sealer be re-applied once or twice a year to maintain the sink.

Stone sealer can be purchased in small quantities at your local hardware or home improvement store.

The grout is also sealed with a grout sealer that should be applied once or twice a year to maintain the sink.
