

VESSEL SINK INSTALLATION GUIDE

What you may need:

1. Mark faucet and drain hole location

- Place sink in desired location on countertop and mark the drain hole and faucet hole centerline with a pencil

NOTE: Make sure clearance is suitable for backsplash, faucet, and plumbing for the sink

2. Drill countertop, cut the opening for the drain in the countertop

3. Install faucet and it's components.

4. Check the alignment of the sink to the opening in the countertop. Use a bead of clear silicone (or preferred adhesive) around the underside of the sink

- Carefully place the sink on the countertop, align, and press firmly
- Allow sealant to set above 60 minutes

NOTE: Use acetone or rubbing alcohol to remove any excess sealant immediately after application.
