NOTE

Following the federal mandate for water efficiency outlined in the Environmental Protection Act of 1992, faucets can be rated for water consumption based on two categories: Flow Rate and Water Consumption. TOTO uses the water consumption standard because it is the most accurate method of measuring water use. TOTO faucets also comply with the CALGreen Guideline of water usage.

Water Savings

TOTO On-Demand [10 sec.] faucet (0.08 gpc): 68% savings over Federal Standard (0.25 gpc) 60% savings over CAL Green (0.20 gpc)

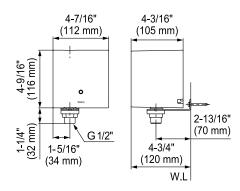

**Gallons per cycle (gpc) is the amount of water discharged per usage cycle.

*** On-demand refers to the way in which the water is dispensed (i.e.; water is only dispensed when the sensor is activated by the user as needed).
