

SS-506

2-VALVE SHOWER ROUGH

Note:

- USE TEFLON TAPE OR PIPE SEALANT FOR THREADED CONNECTIONS
- DO NOT USE PLUMBER'S PUTTY ON ANY OF THE BRASS COMPONENTS
This will cause the finish to tarnish and void the warranty. A non-corrosive Alkoxy Silicone is recommended.
- DURING SWEATING OF LINES DO NOT OVERHEAT CASTING
Overheating may cause damage to internal mechanism and void the manufacturer's warranty as well as increase the risk of scalding.
- COPPER ADAPTORS MAY BE REQUIRED TO COMPLETE YOUR INSTALLATION

Diagram A

Measurements are from the tip of the nipple to the finished wall

Handle Trim #	Measurement (IN.)
A	2 1/4

NOTE: WHEN FITTING HANDLE IT MAY BE NECESSARY TO SHORTEN BROACH STEM AND/ OR THREADED NIPPLE TO MINIMIZE GAP BETWEEN HANDLE AND ESCUTCHEON.

Valve Installation

- Place the valve rough body in position according to mudguard or according to installation Diagram A.
 - For Diagram A, measure from the tip of the nipple to the finished wall.**
- Sweat lines so that water follows arrow on valves.
- Test valve after it is installed.
 - Run valve for 30 seconds and check for leaks
- Once valve has been tested proceed to close wall up to mudguard.
- Install Trim.
 - Mount and hand tighten escutcheons to all thread nipples.
 - Install handles on valves. Stems can be cut down if necessary.
 - NOTE:** For heavier lever handles tighten packing nut (3).
 - NOTE:** Alignment kits are included with most trim to aid in positioning handles horizontally (Diagram D).
 - NOTE:** If valve is set too far in the wall, 1" extension kits may be ordered: Model # SS-EXT60.
